SUMMARY

Recent Computer Science graduate from Atma Jaya Yogyakarta University with solid experience in full-stack development and a strong interest in Machine Learning and Blockchain technologies. Proficient in JavaScript, TypeScript, PHP, Python, and Dart. Highly motivated to apply technical expertise to deliver innovative solutions while actively advancing knowledge in emerging technologies.

EDUCATION

Atma Jaya Yogyakarta University (2021 – Jul 2025)

Bachelor of Computer Science (Sarjana Komputer) – GPA 3.71/4.00

Concentration: Software Engineering, Artificial Intelligence | Relevant Coursework: Web Development, Programming, Software Engineering, Computer Architecture & Organization

Vocational High School Hasanah Pekanbaru (2018 - 2021)

Software Engineering – Score 98/100 | Concentration: Web Development

EXPERIENCES

Infinite Learning Indonesia

Web App Developer | Sep 2024 - Jan 2025

- Built an AI-powered crop recommendation system with 90% accuracy, predicting the top 3 most suitable crops based on real-time weather data.
- Enabled recommendation of 5+ crop types using GIS-based land data analysis.

Atma Jaya Yogyakarta University

Lecturer Assistant | Feb – Jul 2023

- Assisted 200+ students in understanding C programming fundamentals across 4 parallel classes.
- Designed and implemented 1 guided and 1 unguided practical module to support hands-on learning.

Mattcom Indonesia

Full-Stack Developer | Jan – May 2020

- Developed the official APINDO Riau website using Joomla and PHP, delivering 6+ dynamic pages.

PROJECTS

AI-Based Crop Recommendation System

Final Project – Atma Jaya Yogyakarta University (Jul 2025)

- Developed a web-based decision support system integrating Random Forest, CNN (EfficientNetB0), and GIS to recommend the top 3 most suitable crops.
- Achieved 80%+ accuracy in crop recommendations by combining weather data (BMKG API), soil parameters (SoilGrids API), and soil texture images uploaded by users.
- Implemented features such as NDVI satellite visualization and interactive mapping to support precision agriculture and reduce crop failure risks.
- Built with React.js, Node.js, Python, MySQL, OpenCV, GIS.

CERTIFICATIONS

2nd Place – National Hybrid Mobile & Website Development Competition, Infinite Learning (Nov 2024)

Built cross-platform app with React for Web and Kotlin for Mobile to improve team collaboration.

ORGANIZATION EXPERIENCES

Atma Jaya Yogyakarta University – Community Service Program (KKN)

Group Leader | July – Aug 2024

- Led planning and execution of multi-sector community programs (health, technology, education, economic empowerment).
- Coordinated with local government and community stakeholders to ensure impactful program delivery.

Informatics Student Association – Academic & Achievement Division

Vice Coordinator | Oct 2022 – Sep 2023

- Directed a team to organize academic tutorial programs (UTS & UAS), supporting 100+ students.
- Provided strategic guidance that improved division activities, reflected in positive participant evaluations.

Member | Sep 2021 – Oct 2022

- Managed and hosted exam tutorial sessions by recruiting qualified mentors and assisting students in challenging subjects.

Informatics Festival – Information Systems Division

Web Developer | Dec 2021 – May 2023

- Developed and maintained registration dashboards and event websites for Informatics Festival 10 and 11.
- Collaborated with cross-functional teams to ensure efficient registration and smooth event management.

SKILLS

Technical Skills: JavaScript, Python, PHP, C, Dart, Java, TypeScript | React.js, Next.js, Express.js, Flutter, Laravel | MySQL, Firebase, PostgreSQL, MongoDB | Git, Docker, Azure

Languages: Indonesian (Native), English (Professional Working Proficiency)
